New Product Announcement

CV10/C10 N4/3R Keypad Mounting Kit

Saftronics is pleased to announce the release of the Nema-4 and Nema-3R combined door mounting keypad kit for CV10 and C10 drives. These kits will allow the customer to mount the keypads flush on the enclosure door. The fact that they are rated N4/3R will make them suitable for almost any environment. See comments below regarding National Electrical Manufacturers Association (NEMA) standards.

Nema 3R = Enclosures are intended for outdoor use to protect the enclosed equipment against rain. They are not dust, snow nor sleet proof.

Nema 4 = Enclosures are intended for use indoors or outdoors, to protect the equipment against splashing water, seepage of water, falling or hose directed water, and severe external condensation. They are sleet resistant but not sleet proof.

Because the keypads have to be mounted flush on the door, the CV10 mounting kit comes standard with the LCD keypad (No keypad mounted speed pot). The N4/3R keypad mounting kits are not only available for CV10 and C10 product but also for the GP10 and VG10 products, see inverter product catalog for GP10 and VG10 kits part numbers.

Below are the part numbers, description and pricing for the remote mounting keypad kits.

Drive Series	KIT Part Number	Description	List Price
CV10	043-1017	CV10, Keypad Mounting Kit N4/3R, w/5M Cable/LCD	\$375
C10	043-1016-90	C10, Keypad Mounting Kit N4/3R, w/90in. Cable	\$425
