

Catalog

# ABB general machinery drives ACS350, 0.37 to 22 kW / 0.5 to 30 hp

Power and productivity  
for a better world™

# Two ways to select your drive

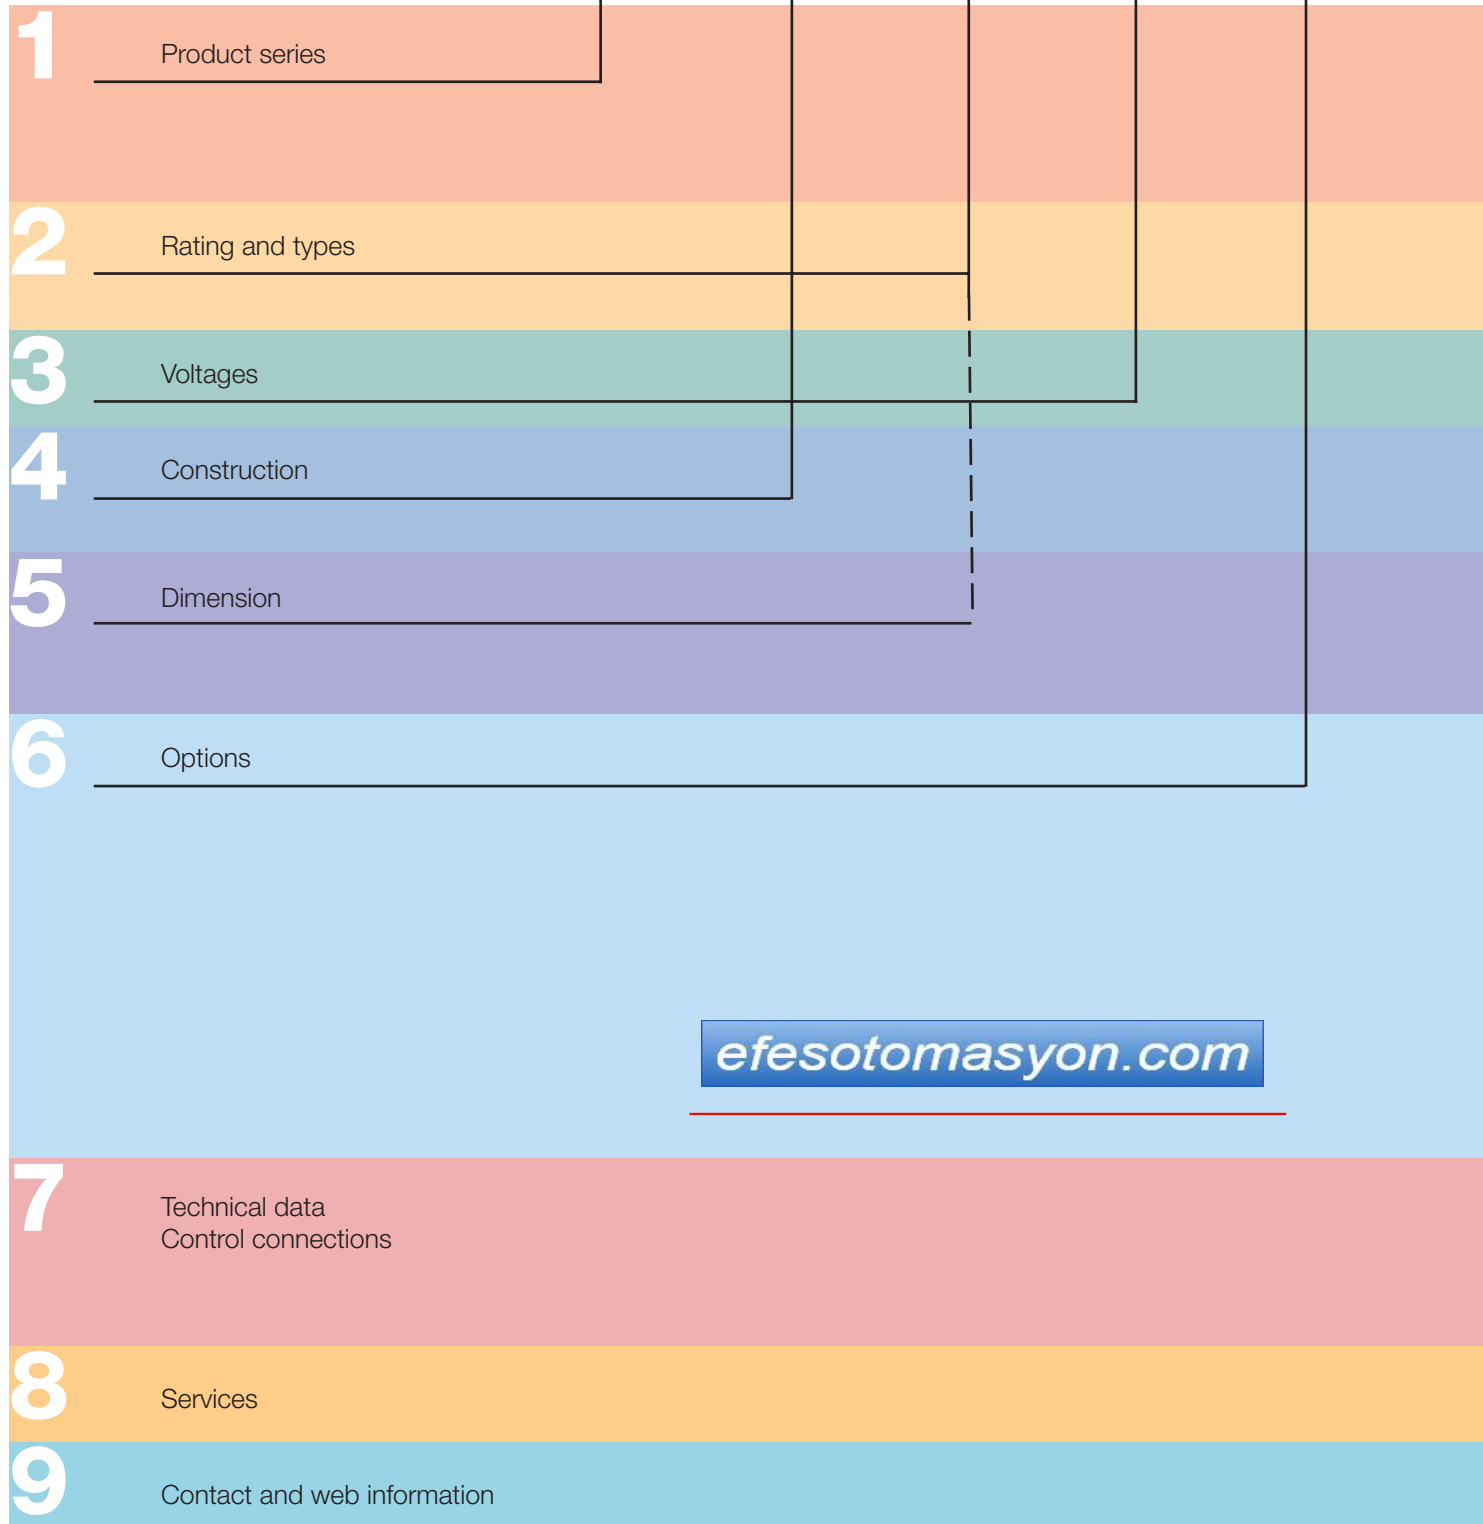

**Choice 1:** Simply contact your local ABB drives sales office (see page 19) and let them know what you want. Use page 3 as a reference section for more information.

OR

**Choice 2:** Build up your own ordering code using the simple 7-step approach below. Each step is accompanied by a reference to a page that is filled with useful information.

**Type code structure:**

ACS350 - 01E - 02A4 - 2 + A123

# ABB general machinery drives

ACS350 - 01E - 02A4 - 2 + A123

## ABB general machinery drives

ABB general machinery drives are designed for machine building. In serial type manufacturing the consumed time per unit is critical. The drives are designed to be the fastest drives in terms of installation, setting parameters and commissioning. The basic products have been made as user-friendly as possible, yet providing high intelligence. The drives offer diverse functionality to cater for the most demanding needs.

## Applications

ABB general machinery drives are designed to meet the requirements of an extensive range of machinery applications. The drives are ideal for food and beverage, material handling, textile, printing, rubber and plastics, and woodworking applications.

## Highlights

- Unified height and depth
- Convenient installation
- Optimized interfaces for users and machines
- Impressive software and compact hardware
- Sequence programming
- High ingress protection (IP66/IP67/UL Type 4X) variant as an option
- FlashDrop tool for fast parameter setting

Feature	Advantage	Benefit
FlashDrop tool	Faster and easier drive set up and commissioning for volume manufacturing and maintenance. The FlashDrop tool enables both downloading and uploading drive parameters.	Fast, safe and trouble-free parameter setting without the need to power-up the drive. Patented.
Sequence programming	Application specific 8-state programming with comprehensive transition and triggering conditions.	Logic programming included as standard. Reduces the need for external PLC.
Software	Excellent performance with exceptional flexibility. Software features include application macros, timed functions and fault history.	Quick and intuitive commissioning.
User interfaces	Panel cover for protection as standard. Assistant control panel with clear alphanumerical dynamic menus, real time clock and 14 languages. Basic panel with numerical display.	Cost efficient approach without control panels. Different control panels available according to functionality need.
Fieldbuses	Enclosed plug-in fieldbus adapters. The most common fieldbuses are available.	High speed communication with compact and robust fieldbus design.
Cabinet compatibility	Screw, DIN-rail, sideways and side-by-side mounting. Unified height and depth.	Optimum installation layout and efficient cabinet space usage.
Inbuilt EMC filter	EMC filter complying with IEC/EN 61800-3 as standard.	No extra space, parts, time or cost required.
Inbuilt brake chopper	100% braking capability.	Reduced cost, saved space and simple wiring.
Drive protection	Motor output and I/O protected against wiring faults. Protection against unstable supply networks. Coated boards included as standard.	Latest solutions to protect the drive and offer trouble free use and the highest quality.
High ingress protection as an option	No need to design special enclosure for applications that demand a high ingress protection. No need for external cooling fan. Wall mounted.	Time and cost savings. No maintenance of external moving parts. Can be located close to the process and operator.

# Technical specification

ACS350 - 01E - 02A4 - 2 + A123

## Mains connection

<b>Voltage and power range</b>	1-phase, 200 to 240 V $\pm$ 10% 0.37 to 2.2 kW (0.5 to 3 hp) 3-phase, 200 to 240 V $\pm$ 10% 0.37 to 11 kW (0.5 to 15 hp) 3-phase, 380 to 480 V $\pm$ 10% 0.37 to 22 kW (0.5 to 30 hp)
<b>Frequency</b>	48 to 63 Hz

## Motor connection

<b>Voltage</b>	3-phase, from 0 to $U_{SUPPLY}$
<b>Frequency</b>	0 to 500 Hz
<b>Continuous loading capability</b> <small>(constant torque at a max. ambient temperature of 40 °C)</small>	Rated output current $I_{2N}$
<b>Overload capacity</b> <small>(at a max. ambient temperature of 40 °C)</small>	1.5 x $I_{2N}$ for 1 minute every 10 minutes At start 1.8 x $I_{2N}$ for 2 s
<b>Switching frequency</b>	
Default	4 kHz
Selectable	4 to 16 kHz with 4 kHz steps
<b>Acceleration time</b>	0.1 to 1800 s
<b>Deceleration time</b>	0.1 to 1800 s
<b>Braking</b>	Inbuilt brake chopper as standard
<b>Speed control</b>	
Static accuracy	20% of motor nominal slip
Dynamic accuracy	< 1% s with 100% torque step
<b>Torque control</b>	
Torque step rise time	< 10ms with nominal torque
Non-linearity	$\pm$ 5% with nominal torque

## Environmental limits

<b>Ambient temperature</b>	-10 to 40 °C (14 to 104 °F), no frost allowed 50 °C (122 °F) with 10% derating
<b>Altitude</b>	Rated current available at 0 to 1000 m (0 to 3281 ft) reduced by 1% per 100 m (328 ft) over 1000 to 2000 m (3281 to 6562 ft)
<b>Relative humidity</b>	Lower than 95% (without condensation)
<b>Degree of protection</b>	IP20 / optional NEMA 1/ UL type 1 enclosure IP66/IP67/UL Type 4X as an option up to 7.5 kW, IP69K available for IP66/IP67 variant with compatible cable glands
<b>Enclosure colour</b>	NCS 1502-Y, RAL 9002, PMS 420 C
<b>Contamination levels</b>	IEC721-3-3 No conductive dust allowed
Transportation	Class 1C2 (chemical gases)
Storage	Class 1S2 (solid particles)
Operation	Class 2C2 (chemical gases) Class 2S2 (solid particles) Class 3C2 (chemical gases) Class 3S2 (solid particles)

## Product compliance

Low Voltage Directive 2006/95/EC  
Machinery Directive 2006/42/EC  
EMC Directive 2004/108/EC  
Quality assurance system ISO 9001  
Environmental system ISO 14001  
UL, cUL, CE, C-Tick and GOST R approvals  
RoHS compliant

## Programmable control connections

<b>Two analog inputs</b>	
Voltage signal	
Unipolar	0 (2) to 10 V, $R_{in} > 312$ k $\Omega$
Bipolar	-10 to 10 V, $R_{in} > 312$ k $\Omega$
Current signal	
Unipolar	0 (4) to 20 mA, $R_{in} = 100$ $\Omega$
Bipolar	-20 to 20 mA, $R_{in} = 100$ $\Omega$
Potentiometer reference value	10 V $\pm$ 1% max. 10 mA, $R < 10$ k $\Omega$
Resolution	0.1%
Accuracy	$\pm$ 1%
<b>One analog output</b>	0 (4) to 20 mA, load < 500 $\Omega$
<b>Auxiliary voltage</b>	24 V DC $\pm$ 10%, max. 200 mA
<b>Five digital inputs</b>	12 to 24 V DC with internal or external supply, PNP and NPN, pulse train 0 to 16 kHz
Input impedance	2.4 k $\Omega$
<b>One relay output</b>	
Type	NO + NC
Maximum switching voltage	250 V AC/30 V DC
Maximum switching current	0.5 A/30 V DC; 5 A/230 V AC
Maximum continuous current	2 A rms
<b>One digital output</b>	
Type	Transistor output
Maximum switching voltage	30 V DC
Maximum switching current	100 mA/30 V DC, short circuit protected
Frequency	10 to 16 kHz
Resolution	1 Hz
Accuracy	0.2%

## Serial communication

<b>Fieldbuses</b>	Plug-in type
Refresh rate	< 10 ms (between drive and fieldbus module)
<b>PROFIBUS DP</b>	9-pin D-connector Baud rate up to 12 Mbit/s PROFIBUS DP and PROFIBUS DPV1 Network side based on "PROFIdrive" profile.
<b>DeviceNet</b>	5-pin screw type connector Baud rate up to 500 kbit/s Network side based on ODVA "AC/DC drive" profile.
<b>CANopen</b>	9-pin D-connector Baud rate up to 1 Mbit/s Network side based on CiA DS402 profile.
<b>Modbus</b>	4-pin screw type connector Baud rate up to 115 kbit/s
<b>Ethernet</b>	RJ-45 connector 10 Mbit/s or 100 Mbit/s Modbus/TCP and EtherNet/IP Network side based on ODVA "AC/DC drive" profile (EtherNet/IP)

## Chokes

<b>AC input chokes</b>	External option For reducing THD in partial loads and to comply with EN/IEC 61000-3-12.
<b>AC output chokes</b>	External option To achieve longer motor cables

# ABB general machinery drives

## ACS350, IP66 and IP66

ACS350 - 01E - 02A4 - 2 + A123

### High protection class drive

A range of ABB general machinery drives with IP66 and IP67 protection classes is designed to excel in the harshest and most demanding of conditions.

Designed for the food and beverage, textile, ceramics, pulp and paper and water and waste water industries, the drives are suitable for screws, mixers, pumps, fans and conveyers especially where the machine is exposed to dust, moisture and cleaning chemicals. The heat sink's cooling fins are completely open from top to bottom, which allows easy washing to ensure no dirt adheres to the surfaces. A user control panel housed within a plastic window is designed to resist moist and dusty atmospheres. Furthermore, the cooling fan is located inside the drive, thereby eliminating the need for an external cooling fan and the subsequent maintenance of external moving parts.

The drive's hygienic design and use of materials meeting current hygiene standards, means that the drive traps no bacteria and can withstand frequent washing. The drive is certified by NSF.

The drive is designed for fast installation, parameter setting and commissioning and is based on ABB general machinery drives, possessing the same software features and hardware connections. The drive features the assistant control panel as standard. The wall mounted drive can be located close to the process and the operator.

### Mains connection

<b>Voltage and power range</b>	3-phase, 200 to 240 V ± 10% 0.37 to 4 kW (0.5 to 5 hp) 3-phase, 380 to 480 V ± 10% 0.37 to 7.5 kW (0.5 to 10 hp)
--------------------------------	---

### Environmental limits

<b>Ambient temperature</b>	-10 to 40 °C (14 to 104 °F), no frost allowed
<b>Degree of protection</b>	IP66/IP67/UL Type 4X, indoor use only IP69K with compatible cable glands

### Product compliance

Low Voltage Directive 73/23/EEC with supplements  
Machinery Directive 98/37/EC  
EMC Directive 89/336/EEC with supplements  
Quality assurance system ISO 9001  
Environmental system ISO 14001  
CE and C-Tick approvals  
UL and cUL pending  
GOST R approval  
RoHS compliant  
NSF Certified  
DIN40050-9 (IP69K)

# Ratings, types, voltages and construction

ACS350 - 01E - 02A4 - 2 + A123

## Type code

This is the unique reference number (shown above and in column 4, right) that clearly identifies your drive by power rating and frame size. Once you have selected the type code, the frame size (column 5) can be used to determine the drive dimensions, shown on the next page.

## Voltages

ACS350 is available in two voltage ranges:

2 = 200 - 240 V

4 = 380 - 480 V

Insert either "2" or "4", depending on your chosen voltage, into the type code shown above.

## Construction

"01E" within the type code (shown above) varies depending on the drive phase and EMC filtering. Choose below the one you need.

01 = 1-phase

03 = 3-phase

E = EMC filter connected, 50 Hz frequency

U = EMC filter disconnected, 60 Hz frequency

(In case the filter is required it can easily be connected.)

B063 = IP66/IP67/UL Type 4X enclosure

# Options Interfaces

ACS350 - 01E - 02A4 - 2 + A123

## User interfaces

### Panel cover

The purpose of the panel cover is to protect the drive's connection surfaces. The ACS350 drive is delivered with a panel cover as standard. In addition there are two alternative control panels available as options.

### Basic control panel

The basic control panel features a single line numeric display. The panel can be used to control the drive, set the parameter values or copy them from one drive to another.

### Assistant control panel

The assistant control panel features a multilingual alphanumeric display for easy drive programming. The control panel has various assistants and an inbuilt help function to guide the user. It includes a real time clock, which can be used during fault logging and in controlling the drive, such as start/stop. The control panel can be used for copying parameters for back up or for downloading to another drive. A large graphical display and soft keys make it extremely easy to navigate. The drive with IP66/IP67 enclosure has the assistant control panel as standard.

### Potentiometer

Potentiometer MPOT-01 with two switches: start/stop and forward/reverse. Polarity is selected with DIP switches. No external power source is needed for the potentiometer.

### Panel mounting kits

To attach the control panel to the outside of a larger enclosure, two panel mounting kits are available. A simple and cost-efficient installation is possible with the ACS/H-CP-EXT kit, while the OPMP-01 kit provides a more user-friendly solution, including a panel platform that enables the panel to be removed in the same way as a drive-mounted panel. The panel mounting kits include all hardware required, including 3 m extension cables and installation instructions.

# Options Interfaces

ACS350 - 01E - 02A4 - 2 + A123

Fieldbus module

NEMA 1/UL type 1 kit

## Machine interfaces

The plug-in fieldbus modules bring connectivity to major automation systems. A single twisted pair cable avoids large amounts of conventional cabling, thereby reducing costs and increasing system reliability.

ACS350 supports the following fieldbus options:

- PROFIBUS DP
- CANopen
- DeviceNet
- Modbus RTU
- Ethernet

The optional FEPA-01 module provides auxiliary power for the fieldbus module in case of a mains power interruption. This module is compatible with all fieldbus modules for ACS350.

## Extension modules

### MREL-01

ACS350 has one relay output as standard. The optional MREL-01 module offers three additional relay outputs, which can be configured for different functions with parameters.

### MTAC-01

The optional MTAC-01 module offers pulse encoder interface for speed measurement.

EMC filter grounding screw (EMC)

Varistor grounding screw (VAR)

Removable clip for labeling

Panel connector

FlashDrop connection

LEDs

Analog I/O

Relay output

Digital inputs

Digital output

## Protection and installation

### NEMA 1/UL Type 1 kit

The NEMA 1/UL Type 1 kit includes a connection box for finger protection, conduit tube installation, and a hood for protection against dirt and dust.

### Terminal cover

The terminal cover is for protection of the I/O connections.

### Clamping plates

The clamping plates are used for protection against electrical disturbances. The clamping plates with clamps are included in the drive package as standard.

Terminal cover (included as standard)

Clamping plates (included as standard)

# Options

## Software tools

A separate order line and type code is required for any of these software tool options.

### DriveWindow Light 2

DriveWindow Light 2 is an easy-to-use start-up and maintenance tool for ACS350 drives. It can be used in an offline mode, which enables parameter setting at the office even before going to the actual site. The parameter browser enables viewing, editing and saving of parameters. The parameter comparison feature makes it possible to compare parameter values between the drive and saved parameter files. With the parameter subset you can create your own parameter sets. Controlling of the drive is naturally one of the features in DriveWindow Light. With this software tool, you can monitor up to four signals simultaneously. This can be done in both graphical and numerical format. Any signal can be set to stop the monitoring from a predefined level.

### Sequence programming tool

DriveWindow Light 2 allows the user to visually build and manipulate sequence programming parameters that are loaded into the ACS350. The programming is done in a graphical editor which displays each sequence step as an individual block.

Sequence programming enables application specific programming. This new and easy way to preset sequences reduces the need for an external programmable logic control (PLC). In simple applications an external PLC can be left out.

### Start-up wizards

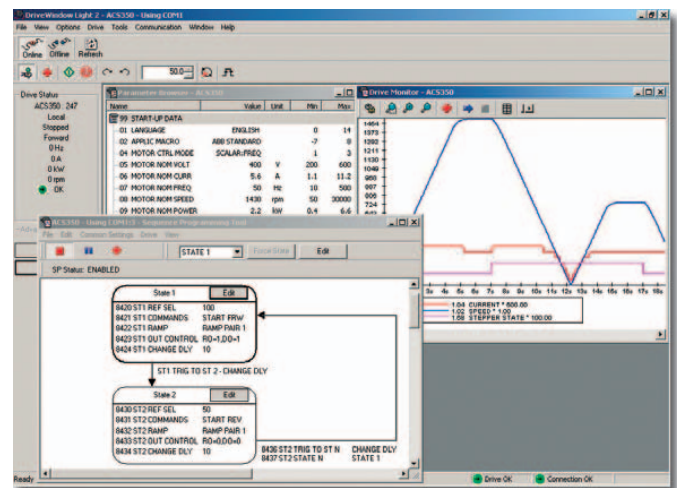

Start-up wizards make the setting of parameters easy. Simply launch the wizard, select an appropriate assistant e.g. for setting analog outputs, and all parameters related to this function are shown together with help pictures.

### Highlights

- Graphical sequence programming tool for ACS350
- Editing, saving and downloading parameters
- Graphical and numerical signal monitoring
- Drive control
- Start-up wizards

### DriveWindow Light requirements

- Windows NT/2000/XP/Vista
- Free serial port from a PC
- Free control panel connector

# Options

## External

A separate order line and type code is required for any of these external options.

### FlashDrop tool

FlashDrop is a powerful palm sized tool for fast and easy parameter selecting and setting. It gives the possibility to hide selected parameters to protect the machine. Only the parameters needed in the application are shown. The tool can copy parameters between two drives or between a PC and a drive. All the above can be done without a power connection to the drive – in fact, it is not even necessary to unpack the drive.

### DrivePM

DrivePM (Drive parameter manager) is a tool to create, edit and copy parameter sets for FlashDrop. For each parameter/group the user has a possibility to hide it, which means that the drive user does not see the parameter/group at all.

### DrivePM requirements

- Windows 2000/XP/Vista
- Free serial port from a PC

### FlashDrop package includes

- FlashDrop tool
- DrivePM software on a CD-rom
- User's manual in English and in pdf-format on the CD-rom
- Cable OPCA-02 for connection between the PC and FlashDrop tool
- Battery charger

### Brake resistors

ACS350 is delivered with an integrated brake chopper as standard. Therefore no additional space or installation time is needed. The brake resistor is selected using the table below. For more information about the selection of brake resistors, see the ACS350 User's Manual.

### Brake chopper limits and resistor selection table

Type code ACS350-	$R_{min}$ [ohm]	$P_{BRmax}$ [kW] [hp]		Selection table by resistor type

## External

A separate order line and type code is required for any of these external options.

### Input chokes

Input choke smooths the wave shape of mains current and reduces total harmonic distortion (THD). Together with the input choke, the ACS350 is designed to fulfill the requirements of the harmonics standard EN/IEC 61000-3-12. In addition, the input choke provides improved protection against mains voltage transients.

Type code ACS350-	Frame size	Input choke	$I_{IN}$ without choke [A]	$I_{IN}$ with choke [A]	$I_{TH}$ [A]	$L$ [mH]
<b>1-phase supply voltage 200 - 240 V units</b>

$I_{IN}$  = Nominal input current  
 $I_{TH}$  = Nominal choke thermal current  
 $L$  = Choke inductance

### Output chokes

Output choke decreases  $du/dt$  on the output and filters current spikes caused by voltage spikes. With an output choke it is possible to increase the motor cable length which could be otherwise limited due to a temperature increase resulting from current spikes and electromagnetic performance.

Type code ACS350-	Frame size	Output choke	Cable length [m]

# Options

## External

A separate order line and type code is required for any of these external options.

### EMC filters

The ACS350's internal EMC filter is designed to meet category C3 requirements of EN/IEC 61800-3 standard. External EMC filters are used to enhance the drives electromagnetic performance in conjunction with its internal filtering. Maximum motor cable length depends on required electromagnetic performance, according to the table below.

Type code ACS350-	Frame size	Filter type	Cable length <sup>1)</sup> with external EMC filter			Cable length <sup>1)</sup> without external EMC filter	
			C1 [m]	C2 [m]	C3 [m]	C3 [m]	C4 [m]
<b>1-phase supply voltage 200 - 240 V units</b>

03X-38A0-4	R4	RFI-34	-	30	-	30	50
03X-44A0-4	R4	RFI-34	-	30	-	30	50

<sup>1)</sup> Internal EMC filter must be connected with the EMC screw in the drive. When the filter is not connected the C4 maximum cable lengths are allowed to be used.

### Low leakage current filters

Low leakage current filters are ideal for installations where residual current devices (RCD) are required and leakage current needs to be below 30 mA.

Type code ACS350-	Frame size	Filter type	Cable length <sup>1)</sup> with LRFI filter
			C2 [m]
<b>Low leakage current filters, 3-phase supply voltage 400 V units</b>			
03X-01A2-4	R0	LRFI-31	10
03X-01A9-4	R0	LRFI-31	10
03X-02A4-4	R1	LRFI-31	10
03X-03A3-4	R1	LRFI-31	10
03X-04A1-4	R1	LRFI-31	10
03X-05A6-4	R1	LRFI-31	10
03X-07A3-4	R1	LRFI-32	10
03X-08A8-4	R1	LRFI-32	10

<sup>1)</sup> Internal EMC filter must be disconnected by removing the EMC screw from the drive.

### EMC standards in general

EN 61800-3 (2004), product standard	EN 55011, product family standard for industrial, scientific and medical (ISM) equipment	EN 61800-3/A11 (2000), product standard
Category C1	Group 1 Class B	1 <sup>st</sup> environment, unrestricted distribution
Category C2	Group 1 Class A	1 <sup>st</sup> environment, restricted distribution
Category C3	Group 2 Class A	2 <sup>nd</sup> environment, unrestricted distribution
Category C4	Not applicable	2 <sup>nd</sup> environment, restricted distribution

## Cooling

ACS350 is fitted with cooling fans as standard. The cooling air must be free from corrosive substances and must not be above the maximum ambient temperature of 40 °C (50 °C with derating). Heat dissipation from IP66/IP67 drive equals to the IP20 values. For more specific limits see the Technical specification - Environmental limits in this catalogue.

X within the type code stands for E or U.

\*) According to IEC-60269 standard.

<sup>1)</sup> If 50% overload capacity is needed, use the bigger fuse alternative.

# Control connections

The diagram below gives an overview of ACS350 control connections and shows the default I/O connections for the ABB standard macro. ACS350 has seven standard macros and three user macros. Please refer to the ACS350 User's Manual for more detailed description of each macro.

## Sinking DI configuration (NPN connected)

## Sourcing DI configuration (PNP connected) with external power supply

All industries face a common goal: to maximize their production output at the lowest possible cost, while maintaining the highest quality end products. One of ABB's key objectives is to maximize the uptime of its customers' processes by ensuring optimum lifetime of all ABB products in a predictable, safe and low cost manner.

The services offered for ABB low voltage drives span the entire value chain, from the moment a customer makes the first enquiry through to disposal and recycling of the drive. Throughout the value chain, ABB provides training and learning, technical support and contracts. All of this is supported by one of the most extensive global drive sales and service networks.

## Maximizing return on investment

At the heart of ABB's services is its drive lifecycle management model. All services available for ABB low voltage drives are planned according to this model. For customers it is easy to see which services are available at which phase.

precisely the timing of the part replacements plus all other maintenance related actions. The model also helps the customer when deciding about upgrades, retrofits and replacements.

Drive specific maintenance schedules are also based on this four-phase model. Thus, a customer knows

Professional management of the drive's lifecycle maximizes the return on any investment in ABB low voltage drives.

## ABB drive lifecycle management model

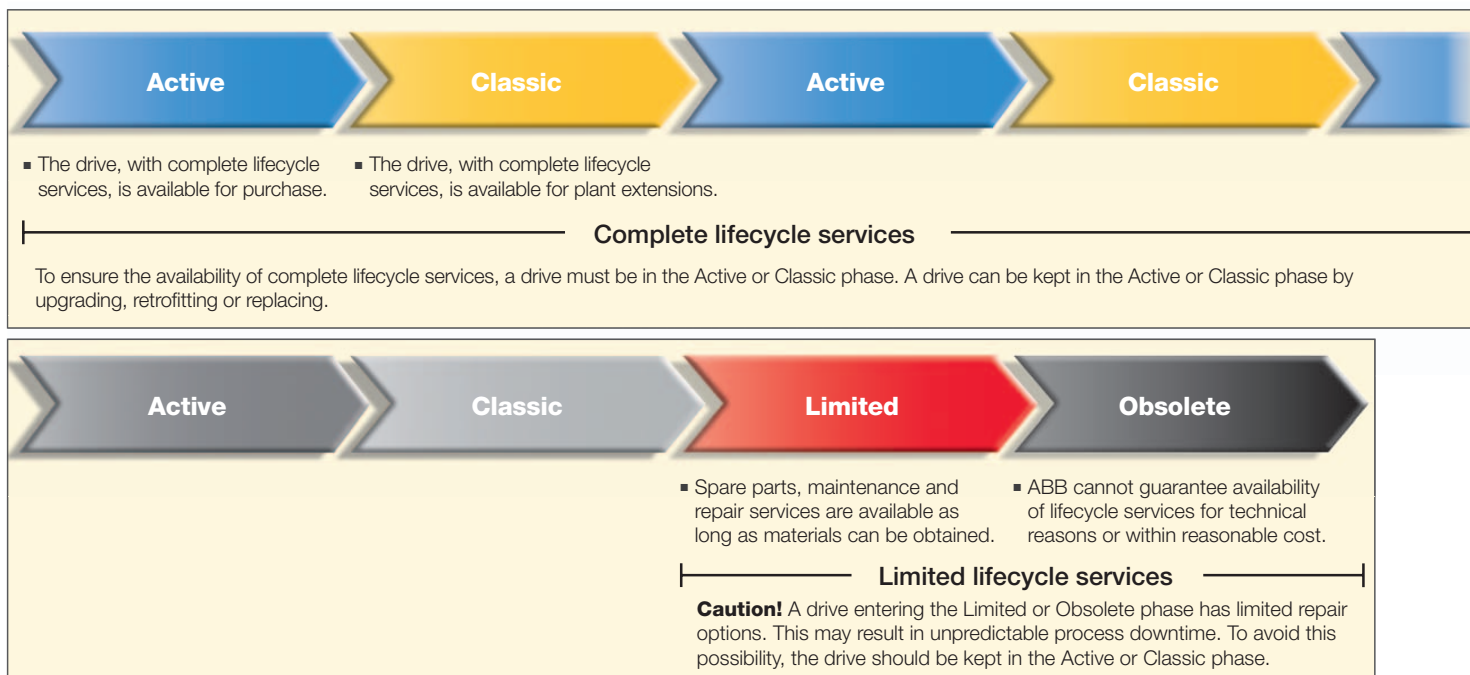

ABB follows a four-phase model for managing drive lifecycles, which brings enhanced customer support and improved efficiency.

Examples of lifecycle services are: selection and dimensioning, installation and commissioning, preventive and corrective maintenance, remote services, spare part services, training and learning, technical support, upgrade and retrofit, replacement and recycling.

# Contact and web information

[www.abb.com/drives](http://www.abb.com/drives)

ABB's worldwide presence is built on strong local companies working together with the channel partner network. By combining the experience and know-how gained in local and global markets, we ensure that our customers in all industries can gain the full benefit from our products.

For further details about all our low voltage AC drives and services please contact your nearest ABB office or ABB drives channel partner or visit the websites [www.abb.com/drives](http://www.abb.com/drives) and [www.abb.com/drivespartners](http://www.abb.com/drivespartners).
